

Search Horizontal Catalog :-

- In Snowflake, the Catalog is where all your *database
 - *schemas
 - *tables
 - *views
 - *other objects.
- The Horizontal is basically the top search bar in the Snowflake web UI.

Snowflake market place :-

- It is online-store, but for data.
- It is place where you can find, use or share data directly inside snowflake without download anything.

Storage Capacity :-

- It's cloud-based, so it doesn't have an fixed 'disk size'.

→ Few Gibs to Petabytes (PB) of data - basically virtually unlimited.

→ 3x 5x data type

Snowflake uses terabytes (TB) :-

• 1 TB = 1024 Gibs.

Eg:-

• 100 Gibs raw data → may take - 20/50 Gibs.
• 1 PB = 1024 TB = 1,048,576 Gibs.

New data warehouse storage credits :-

→ storage vs compute credits.

→ new data warehouses.

→ credit type or Pricing change.

Xs - 1 Credit / hour.

S - 2 credit / hour.

M - 4 credit / hour.

→ Minimum 60-sec change when you start a warehouse.
