Search Horizontal Catalog :-

→ In Snowflake, the Catlog is where all your *database
*schemas
*tables
*views
*other object.

→ The Horizontal is basically the top Search bar in the Snowflake web UI.

Snowflake market place :-

→ It is online-store, hut for data.

→ It is place where you can find, use or share data directly inside snowflake without downloading anything.

Storage Capacity :-

→ It's cloud-based, so it don't have an fixed 'Disk size'.

→ Few GiBs to Petabytes (PB) of data.
basically virtually unlimited.

→ 3 x 5 x data type

Snowflake uses terabytes (TB):-

. 1 TB = 1024 GiB.

Eg:-
. 100GiB raw data → may take - 20/50 GiB.
. 1PB = 1024 TB = 1,048,576 GiB.

New data warehouse storage credits:-

⇒ storage vs compute credits.
→ new data warehouses.
⇒ credit type or Pricing change.

XS - 1 credit/hour.
S - 2 credit/hour.
M - 4 credit/hour.

→ Minimum 60-Sec change when you
start a warehouse.
